LEGO CLUB

Bricks and Brains: Lego Club's New Challenges!

Get ready to build because our Lego Club has officially kicked off its new series of Lego Challenges for the term, and it's been a blast!

This week, students were buzzing with creativity as they worked together in teams to master their first engineering feat. Watching them collaborate, problem-solve, and cheer each other on was fantastic. These challenges aren't just about building; they're about developing teamwork, communication, and critical thinking skills all while having a ton of fun!

A Quick Reminder

Please note that this term, Lego Club will **finish at the earlier time of 4:00 PM**. We can't wait to see what amazing creations they come up with next week!

Week 1 Challenge - The Load-Bearing Bridge

The Task: Build a long bridge to get a small cup of weights across a 30cm gap (the space between the two books).

Rules

1. The bridge must go all the way across and stand up by itself.
2. Only LEGO bricks may be used.
3. The bridge must be wide enough to safely hold the testing cup in the middle.
